

MANISH KUMAR SHARMA

Service Delivery Manager | Infrastructure Operations Leader | Technical Program Manager | IT
Infrastructure Transformation | VMware & Cloud Modernization

E-mail: manishkumarsharma24@gmail.com | Mobile: +91 - 8747972015 | [LinkedIn](#)

PROFILE SUMMARY

Accomplished **Senior Principal Engineer and Technology Leader** with **22+ years of experience** architecting, modernizing, and delivering large-scale enterprise software platforms across **Supply Chain & Logistics, Fleet Management, Banking & Financial Services, Telecommunications, Government, and Enterprise Integration** domains. Deep expertise in **Java, Spring Boot, Microservices, Distributed Systems, Cloud-Native Architecture, Event-Driven Platforms, AWS, Kubernetes, Docker, Messaging Systems, and Enterprise Integration**, driving scalable, resilient, and high-performance solutions. Proven track record of leading **architecture, engineering strategy, product delivery, modernization initiatives, and mission-critical platform transformations**, while balancing technical excellence, business objectives, scalability, security, and operational efficiency. Successfully led and mentored globally distributed engineering teams of up to **20+ members**, collaborating with product, business, and customer stakeholders to define roadmaps, deliver complex programs, accelerate releases, and improve engineering productivity. Recognized for combining **hands-on technical depth with strategic leadership**, serving as a trusted advisor for architecture decisions, production-critical issue resolution, cloud adoption, platform reliability, and enterprise-scale software engineering best practices. Delivered impactful solutions for global organizations including **Manhattan Associates, Finastra (Misys), Waste Management, Maruti Suzuki, British Telecom, GE, and Government agencies**, consistently driving innovation, customer success, and long-term business value.

CORE COMPETENCIES

Enterprise Solution Architecture | Cloud-Native & Microservices Architecture | Distributed Systems Engineering | Java & Spring Boot Development | AWS Cloud & Kubernetes Platforms | Event-Driven & Messaging Architectures | Technical Leadership & Team Mentoring | Product Engineering & Agile Delivery | System Design & Scalability Engineering | Enterprise Integration & API Strategy | Platform Modernization & Digital Transformation | Production Support & Incident Management | Stakeholder Management & Client Engagement | Performance Optimization & Reliability Engineering | Architecture Governance & Code Quality Reviews | AI-Assisted Engineering & Developer Productivity

TECHNICAL SKILLS

Programming Languages & Design: Java, J2EE, SQL, XML, UML, Object-Oriented Design (OOD), Design Patterns
Backend Development & Frameworks: Spring Boot, Spring MVC, Microservices Architecture, RESTful APIs, Hibernate, JPA, iBatis, Enterprise Application Development
Messaging, Event Streaming & Search: Apache Kafka, RabbitMQ, JMS, Amazon Kinesis, Elasticsearch, Event-Driven Architecture
Cloud, Containers & DevOps: AWS (EC2, S3, DynamoDB, CloudWatch, CloudFormation), Docker, Kubernetes, Jenkins, CI/CD Pipelines, Splunk
AI-Assisted Engineering & Productivity: Claude (Anthropic), Windsurf, AI Agents, AI-Assisted Development, Developer Productivity Automation
Databases & Data Management: Oracle Database, MySQL, Data Modeling, Query Optimization, Database Performance Tuning
Testing, QE & Automation: JUnit, TestNG, Unit Testing, Integration Testing, Test Automation, Code Quality Assurance
Build, Version Control & Configuration Management: Maven, Ant, Git, Bitbucket, Subversion (SVN), Source Code Management
Development Tools & Platforms: IntelliJ IDEA, Eclipse IDE, Linux, Unix, Windows, macOS

WORK EXPERIENCE

Oct 2020 - Jun 2026 | Manhattan Associates | Senior Principal SWE / Senior Manager

- Led architecture and delivery for a large-scale fleet management SaaS platform, guiding a 15-member engineering team in roadmap planning, solution design, estimation, and execution of high-impact product initiatives.
- Established architecture standards and design governance by driving HLD creation, reviewing LLDs, and ensuring system scalability, reliability, security, and operational excellence across cloud-native microservices.
- Provided hands-on technical leadership in the development of mission-critical capabilities, leveraging Java, Spring Boot, RabbitMQ, Elasticsearch, Docker, and Kubernetes to enhance platform performance and business value.
- Drove engineering quality and operational excellence through architecture reviews, code governance, production issue resolution, and continuous improvement initiatives, ensuring high availability and superior customer experience.
- Led resolution of high-severity production incidents and Go-Live critical issues, driving root-cause identification and timely recovery actions that ensured 15 successful customer deployments and recognition with the Spirit Award.
- Accelerated delivery of high-priority Dispatch enhancements by actively addressing critical functionality gaps, driving increased customer satisfaction, earning formal client recognition, and strengthening confidence for subsequent customer go-lives.

Nov 2019 - Apr 2020 | Whishworks (now Coforge) | Maruti Suzuki - Enterprise Integration Platform (ESB) | Senior Technical

Architect

- Architected a cloud-native Enterprise Integration Platform connecting Maruti Suzuki's enterprise ecosystem with Salesforce through scalable microservices, REST services, and batch processing frameworks.
- Defined integration blueprints, HLDs, and LLDs while partnering with business and Salesforce stakeholders to design robust data flows, integration patterns, and enterprise connectivity solutions.
- Led end-to-end solution design for real-time and asynchronous integrations, optimizing scalability, reliability, and operational performance across multiple business domains.
- Combined strategic architecture leadership with hands-on development expertise to deliver mission-critical microservices and accelerate successful platform adoption.
- Turned around a high-risk integration project by leading onsite customer engagements and cross-functional war-room sessions with Salesforce teams, resolving critical issues, restoring stakeholder confidence, and securing customer sign-off for the next project phase.
- Recovered a high-risk integration program by aligning Salesforce and Maruti stakeholders on integration touchpoints, transaction volumes, and business requirements, enabling successful HLD/LLD execution and on-time project delivery.

Jul 2016 - Oct 2019 | WM Logistics India | Principal Software Engineer

Operational Control System (OCS) - Waste Management (North America)

Modernized a mission-critical operational platform supporting 26,000+ vehicles and 21M+ customers by transforming legacy monolithic applications into a scalable AWS-based microservices ecosystem.

Tech Stack: Java, Spring Boot, AWS (EC2, S3, DynamoDB, Kinesis), Microservices, iBatis, Angular, Docker, Kubernetes, Splunk

- Architected and delivered cloud-native microservices on AWS, decomposing legacy monolithic applications into scalable, independently deployable services that enhanced system agility, resilience, and operational scalability.
- Engineered high-performance backend solutions leveraging Spring Boot, DynamoDB, Kinesis, and containerized deployments, significantly improving throughput, fault tolerance, and peak-load handling for enterprise-scale logistics operations.
- Served as the lead escalation engineer for critical P1 production incidents, driving rapid root-cause analysis, service restoration, and SLA adherence while minimizing business disruption across large-scale operational environments.
- Mentored and guided engineering teams on AWS architecture, microservices best practices, and cloud-native development standards, accelerating platform modernization and strengthening engineering capability across the organization.

Nov 2011 - Mar 2016 | Misys (now Finastra) | Expert Software Engineer

Loan IQ - World's Leading Syndicated-Lending Platform

- Spearheaded the design and delivery of strategic enhancements for Loan IQ, the world's leading syndicated lending platform, supporting mission-critical lending operations for 50+ global banks.
- Provided technical leadership across full feature lifecycle, defining solution architectures, reviewing designs, & guiding implementation of complex lending functionalities including deal management, interest calculations, fee processing, and SWIFT integrations.
- Championed platform quality, scalability, and maintainability through architectural governance, code reviews, and engineering best practices, ensuring alignment with stringent financial services standards.
- Partnered closely with product management and global stakeholders to translate evolving banking requirements into robust enterprise solutions that enhanced platform capabilities and customer value.

Feb 2006 - Oct 2011 | MASTEK | Senior Developer / Module Leader

Registers of Scotland | British Telecom UK | 2006-2011

- Senior Developer on Scottish Government's land registration system - EJB/Spring/Hibernate services, JMS messaging, SOAP integration (30-member team, 5-year engagement).

Oct 2003 - Feb 2006 | Tata Consultancy Services | Assistant System Engineer

GE Infrastructure Suite | 2003-2006

- Developer on four GE projects: Sales Portal (SAP integration), RMD (diagnostic reporting), RCM (corrosion monitoring), eNPI (product approval workflow).

EDUCATION DETAILS

B.E. Computer Science - Institute of Engineering & Technology, DAVV, Indore (M.P.) | 2003
